

Luma CLASSIC

- ⦿ classical audio guide design
- ⦿ reliable & robust
- ⦿ high-resolution colour screen
- ⦿ automatic triggering & media synchronisation

Luma CLASSIC combines our demands for a functional classical design, reassuring longevity and top-notch audio quality.

Luma CLASSIC offers a combination of a keypad and three navigation buttons. Detailed information can be stored for access via the blue multi-function button.

Audio files, text, images and videos can be displayed on the 2.4-inch colour screen.

The integrated speaker provides guides in impressive audio quality. The volume can be individually set using a rocker button on the side of the device. Alternatively, headphones can also be connected. This is particularly important if visitors are required to concentrate completely on the on-screen content.

Audio content can be automatically triggered and videos launched with lip-synched audio on the device.
