

# ActiveGuide / SolarGuide

Our autonomous audio systems for outdoors

- environmentally friendly
- uses solar or muscle power, no electricity needed
- weatherproof & robust
- high fun factor

## Areas of application:

nature reserves, national parks,  
gardens and zoos  
open-air museums, hiking and  
cycling trails, publicly accessible  
exhibitions, ...

The ActiveGuide requires no connection to the electricity grid. Thanks to its hand crank, visitors can power it with muscle power alone. The SolarGuide model integrates a solar panel, ensuring sufficient energy from the skies. The speaker plays MP3 files in outstanding audio quality. The volume can be pre-set as required.

This audio system is ideal for use in open-air situations. Installation is simple, and thanks to their metal casing, powder-coated finish and moisture-resistant speaker, ActiveGuide & SolarGuide are ideally equipped to stand up to the elements.

The ActiveGuide & SolarGuide are environmentally friendly and have a small carbon footprint.

We specialise in audio guides – draw on our know-how to produce your content!

# ActiveGuide

Our muscle powered autonomous audio system for outdoors

## Function

The ActiveGuide requires no connection to the electricity grid. Thanks to its hand crank, visitors can power it with muscle power alone. A green light indicates when enough cranking has been done. The ActiveGuide then plays the individual audio tracks at the touch of a button. If the LED lights up red, it means: keep cranking! If desired, the ActiveGuide can play an instruction manual while cranking.

## Equipment

Up to eight buttons are available for different audio tracks and languages. The speaker plays MP3 files in outstanding audio quality, and the volume can be pre-set as required. Thanks to the metal casing, powder-coated finish and moisture-resistant speaker, the ActiveGuide is ideally equipped to stand up to the elements.

## Application Areas

All types of outdoor areas like nature reserves and national parks, gardens, zoos, open-air museums, hiking and cycling trails, publicly accessible exhibitions, and so on.

## Installation

Installation is simple. The ActiveGuide can be mounted on walls or posts. We supply two round mounting brackets for posts or screws for a wall mounting.

### Technical Data:

<b>Measurements ActiveGuide:</b>	Width	17 cm
	Depth	16 cm
	Height	26,5 cm
<b>Information board:</b>	Width	15,5 cm
	Height	15 cm
<b>Buttons:</b>		Ø 2 cm
<b>Weight:</b>		7,2 kg
<b>Battery:</b>		LiPo 2.400 mAh / Pd 2.500 mAh
<b>Operating Temperature:</b>		-40° to +60° C
<b>Loud Speaker:</b>		Moisture-resistant (IP 44 standard)
<b>Audio Format:</b>		MP3, 128 kbps
<b>Certificate:</b>		WEEE, RoHS
<b>Warranty:</b>		24 months

### Basic Equipment:

- 0-8 Buttons
- Memory card (CF)
- Mounting kit: screws for a wall mounting or round mounting brackets (Ø 6 cm) with screws
- Standard color: yellow

### Options:

- Desired color (RAL classic colors)
- Labeling of the information board
